

Defender Spare Wheel Cover Kits

Photos for illustrative purposes only

The considerable weight of the spare tyre on the rear door of your Defender can sometimes make using that door awkward, especially if you're parked on a hill. The same tyre also restricts your view when driving. To help alleviate these problems or to change the look of your Defender, you can now remove the rear tyre and fit colour co-ordinated blanking plates to the rear door. This easy to install 2-piece kit is supplied with all the fixings you need. The plates fit snugly in the recess, ensuring a smart flush finish to your door.

Defender Carpet Kits

Once installed, these easy to fit, hard wearing carpet kits will transform your Defender's interior. The black 5mm woven pile carpet is manufactured with a hardback which ensures it holds its shape for years to come. All holes are pre-cut for a precision fit. No glue is required and with only strips of double-sided tape (supplied where applicable), fitment is quick and easy with no mess. The carpet also has the added advantage of improving soundproofing within the cabin. When applicable, floor mats have a reinforced edged for a smart, hard wearing finish.

Iconic Genuine Minilite Wheels now available for Land Rover's!

The original Minilite wheel, was probably the most successful competition wheel of the 1960's and 70's. As the name suggests, it was originally developed as a magnesium competition wheel for the then revolutionary new Austin 'Mini', but its instant success meant that it was soon to be seen on many of the serious race and rally cars of that era. A new iconic style was born, and to this day, all genuine Minilite wheels are made to that original classic design. Originally conceived for race and rally, demand soon grew for road car applications, and has remained so ever since.
